SUMMARY

A tech savvy self-taught web developer who has a keen interest in learning, researching and developing new programming skills & concepts. Being a technology enthusiast & hobbyist, discovering, following & researching the latest trends, products and updates comes second nature. Having always had a solid interest in problem solving, evolving software integrations and a keen eye for design and implementation. These qualities provided with the accelerated rate in which software and tech are moving makes for an exciting career path as each day will bring forth a new emerging technology or challenge.

Since I am a self-taught programmer, I have no industry experience or working, collaborating and developing with a team. If applicable, I would very much be inclined to take on casual or weekend-based work in order to develop the skills necessary to provide value and perform at an industry level.

EXPERIENCE

[November 2008 – January 2019]
[Currently Employed]
[**Woolworths Ltd – MLDC Warehouse**]

Casual Store person

Responsibilities

> Pick packing, manual handling and creating and completing store orders.
> RFID scanning and accommodating WMS software to sort and store pallets.
> Side-load & front load machinery for loading orders onto trucks for delivery.
> Cycle Counts involve checking warehouse locations for discrepancies in number of products, resupply hold up and general flow of warehouse inventory.

[2018 - Current]
[Personal Projects]
[**Web Development + Design Content**]

Portfolio: https://bionic-fish.github.io

Design & Development
